

ILAB
IN VITRO TOXICOLOGY MEXICO

Innovative solutions for testing toxicological safety through the use of alternative methods.

ILAB In Vitro Toxicology Mexico is dedicated to providing reliable and innovative solutions and technical advice in the safety assessment of a wide variety of products, to guarantee their quality and improve the health of the population in Mexico and the world.

Our value proposition is based on the 3R's principles: Reduce, Refine and Replace the use of animals with validated in vitro methodologies with international acceptance, through the use of reconstituted tissues and molecular techniques, carried out by personnel with more than 10 years of research, development, validation, and execution of this type of tests.
